Using Management Accounting Information: A Decision Case Approach

by Steven J Adams

Using Management Accounting Information: A Decision Case Approach is a case-based approach to management accounting from the perspective of a business manager. It focuses on management accounting, which is a key function in providing management accounting information for decision making, not only for managers but also for internal users. This approach emphasizes the use of accounting data for making decisions, interpreted in the context of a strategic tool.

The book introduces an interactive, decision-making case approach to management accounting, explaining the use of accounting data from management perspectives. It covers topics such as strategy, planning, operations, and control, with a focus on decision making.

The book is designed for management and business students, providing insights into the role of management accounting in strategic decision making. It includes case studies and practical examples to illustrate the application of management accounting principles in real-world scenarios.

The book is a comprehensive resource for understanding how management accounting information can be used effectively to support decision making and strategy formulation. It is an essential read for students, managers, and practitioners who want to enhance their understanding of management accounting and its role in decision making.
In that case he uses information to benchmark actual against. From this perspective, they are similar to the mental models held by individuals. H1a: Management accounting information use for decision-making by CEOs is positively.
